DETAILED ACTION

Claim Objections

1. Claims 14-26 are objected to because of the following informalities: in claim 14, line 11, it is not clear what the "second edge" is connected to; also, the "for" clause in line 1 of the same makes no sense as worded. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 14-20 and 22-26 are rejected under 35 U.S.C. 102(b) as being anticipated by. Mikami et al discloses the claimed invention including the supply troughs with the overlapping edges (Col. 4, lines 10-20).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2841

5. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mikami et al (U.S. # 4,398,612). Mikami et al discloses the claimed invention except for the exact angle of inclination between the first and second faces. However, it has been held that "where the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation." *In re Aller*, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955); and *MPEP* § 2144.05 (II).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fukuda (Fig.s 3 & 6), Matsuura (Fig. 14), and Yamano (Col. 2, lines 18-22 & 43-58) show supply troughs that overlap.
